The latest Learning and Physical Disability Improvement plans were approved by the IJB on 25 August 2021. The plans highlighted the current pressures associated with this sector of the population, newly emerging priorities, our current position and early actions to achieve efficiencies. The plans enable existing resources to be used for areas of greatest need and support the service to respond to increased demand in a planned way, including disinvestment in some areas to allow investment in

	<p>others.</p> <p>The Learning and Physical Disability Improvement plans support the ambition within the Strategic Commissioning Plan of “shifting the balance of care to support more people in our communities and support people to greater independence for longer”. Supported people, carers and family members were also sent individual letters inviting them to the planned engagement events. The letter included a link to the survey which they were invited to use to feedback their views. The survey was open for several weeks. Copies of the plan and feedback form were made available in British Sign Language and Easy-Read. Approximately 100 responses were received.</p> <p>This approach has supported individuals and communities to be at the heart of service planning, delivery and review and to have the opportunity to be involved in the planning, development, delivery and continuous improvement of services.</p> <p>Feedback from the engagement activities was used to inform the finalised Learning and Physical Disability Improvement Plans and action plans that were approved at IJB board in August 2021. In line with the national engagement standards, the finalised plans and action plans have been made available to the general public via the AHSCP website. Letters have been sent out to supported people, carers and family members to inform them of this.</p> <p>National statistics recorded in the Scottish Consortium for Learning Disabilities statistical release have been used to inform the plan as has local and national data from Carefirst, ISD and financial expenditure records.</p> <p>Demographic information from the 2018 Scottish Health Survey has been used to inform the Physical Disability plan as has local and national data from Carefirst, ISD and financial expenditure records.</p>

Step 1.

Is there any reason to believe the proposal could affect people differently due to their protected characteristic? Using evidence (e.g. statistics, literature, consultation results, etc.), justify whether yes or no. If yes, specify whether impact is likely to be positive or negative and what actions will be taken to mitigate against the undesired impact of a negative discrimination. When considering impact, please consider impact on: health related behaviour; social environment; physical environment; and access to & quality of services of NHS Tayside, Angus Council or 3rd sector social justice.

1a. The public and/or service users holding the Protected Characteristics:

AGE	X	X	Learning and Physical disability services are provided for adults with a variety of ages. Some of the actions in the action plans could have either a positive or a negative impact on service users. There could be changes to the way current services are being delivered or to individuals care packages which could be seen to have negative impact depending on the changes.

DISABILITY	X	X	As above comment. Some actions in the actions plans may have an impact on individuals who have particularly complex care needs, including people with a physical disability, learning disability and autism. The welfare of service users is paramount, and they will remain at the centre of any actions taken forward. We will aim to minimise impact to service users, taking in to account

			their needs and ensuring clear and consistent communication and engagement throughout the duration of the improvement plans.

There is potential for some negative impact for some carers depending on the outcome of some of the actions to be progressed, this could be in relation to the service being provided, accommodation or individual care packages.
